AS AUTHORIZED, ITS TRANSMISSION OR THE REVELATION OF ITS CONTENTS TO ANY PERSON TO AN UNAUTHORIZED PERSON IS PROHIBITED BY LAW. REPRODUCTION OF THIS FORM IS PROHIBITED.

THIS IS UNEVALUATED INFORMATION

50X1-HUM

1. The refrigerating equipment factory Kältemaschinenbau Richter, Berlin, Warschauerstrasse, will require the following quantities of Freon refrigerant in the year 1951:

Freon 12 - 5 tons
Freon 13 - 20 tons
Freon 14 - 5 tons
Freon 22 - 35 tons

2. In 1950, the factory received a total of 35 tons of various types of Freon.

3. [redacted] estimates the requirements of the Russian Zone 50X1-HUM for all types of Freon in the year 1951 at between 120 and 150 tons.

4. The Richter factory manufactures at least two sizes of refrigerators. Each type is cylindrical in form, with a door at one end of the cylinder. One type is about 2 meters in diameter and 2½ meters long. The other has a diameter of about 1.30 meter and a length of 1.60 meter.

5. Plants are being constructed in the former Lautawerk, and in Greiz/Döblau for the production of alumina (Al_2O_3). It is planned that the Lautawerk produce 2,500 - 3,000 tons of alumina per month beginning with the third quarter of 1951, and the Greiz factory 1,000 tons per month starting at some later date.
